

FIT College — New Site Map

46 pages (45 in `sitemap.xml` + 1 deliberately unlisted partner lander) replace ~95 declared legacy URLs plus a long tail of orphans. Old → new mapping lives in `redirect-map.csv` (115 rows); launch sequence in the Cutover Runbook.

Terms of Use	<code>/terms.html</code>	Verbatim live copy, migrated 6 Jul 2026
Student Handbook & Policies	<code>/student-handbook.html</code>	Current v3.6 handbook + 6-policy PDF library

Not in sitemap (deliberate)

Page	URL	Why
Affiliate Exclusive Offer	<code>/affiliate-deal.html</code>	Partner-gym entry links only — kept out of organic discovery
Staff referral form	<code>/staffleadform</code> (legacy, kept live)	Internal — noindex
Blog	<code>blog.fitcollege.edu.au</code>	Separate HubSpot property — footer-linked

robots.txt (deployed with the sitemap at cutover)

- Adds Sitemap: `https://www.fitcollege.edu.au/sitemap.xml` — the legacy robots.txt declared no sitemap at all
- Keeps legacy admin disallows: `/adm/` , `/Members/` , `/imagedetail.aspx` , `/cdn-cgi/`
- Blocks retired utility endpoints: `/thank-you` , `/landing-thanks` , `/promo-thanks`

Numbers at a glance

Metric	Old site	New site
Declared sitemap URLs	~95 (mixed canonical + legacy + promo)	45 (canonical only)
Duplicate URL structures	Same page at 2–3 URLs (About, RPL, USI, FAQs, 3 campuses, 3 courses)	0 — one URL per page
Expired campaign pages indexed	~22	0 (all 301/410)
Sitemap declared in robots.txt	No	Yes
Redirect rows mapped	—	115 (<code>redirect-map.csv</code>)

If Kook implements clean URLs instead of `.html` paths, regenerate `sitemap.xml` and the CSV targets from the same source — flagged in both files.
