LEAD CAPTURE · HANDOVER FOR KOOK

Every enquiry, straight to the right Career Advisor

One screen to capture everything, then a second screen that names their advisor, promises contact within 1 business day, and offers to book a time or call now.

2,664 postcodes | 10 advisors | HubSpot form + reCAPTCHA | Source: POSTCODE MASTER vNOV26 | Prototype: contact.html

THE CHANGE

From "someone will call" to "Tess will call, or book now"

Today a lead fills in a form and waits, not knowing who or when. Every minute between enquiry and conversation costs conversions.

TODAY

- Fills in a generic form
- Generic thank-you page
  No name, no timeframe, no next step
- Lead sits in a shared pool
  Someone works out who owns it
- Waits for a call they may miss

NEW

- One form, all details
  Everyone gets the info pack; every submission is a lead
- "Tess will be in touch within 1 business day"
  Named advisor, clear timeframe
- Don't want to wait? Book a time or call now
  Tess's calendar, details prefilled
- Owner set to Tess in HubSpot, SMS names her

Everyone gets a promise; the keen ones book on the spot.

HOW IT WORKS

Two screens for the lead

HubSpot handles capture, spam protection and automation; our code works out the advisor and shows screen 2.

1

Lead clicks a CTA

From any page. The page they came from is recorded (`lead_source_page`) and its course preselected.

LEAD

→

2

Screen 1: one form

Name, email, mobile, course, where they live (postcode or country), consent. reCAPTCHA on.

HUBSPOT FORM

→

3

Routing

On HubSpot's success event, our code applies the routing rules to the submitted values.

WEBSITE

→

4

Screen 2: promise + options

"Tess will be in touch within 1 business day." Book a time now (Tess's calendar) or call now.

WEBSITE

→

5

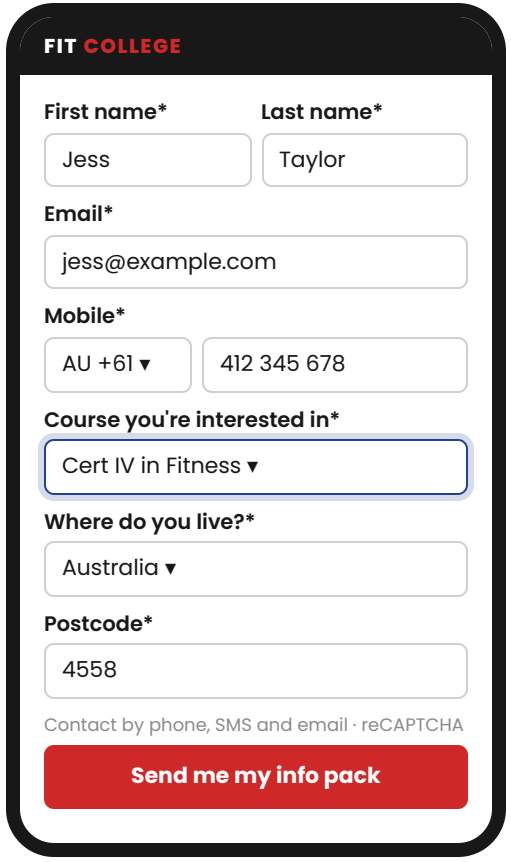

Automation

Workflow sets owner (same rules, only if blank), SMS names the advisor, info pack emailed.

HUBSPOT

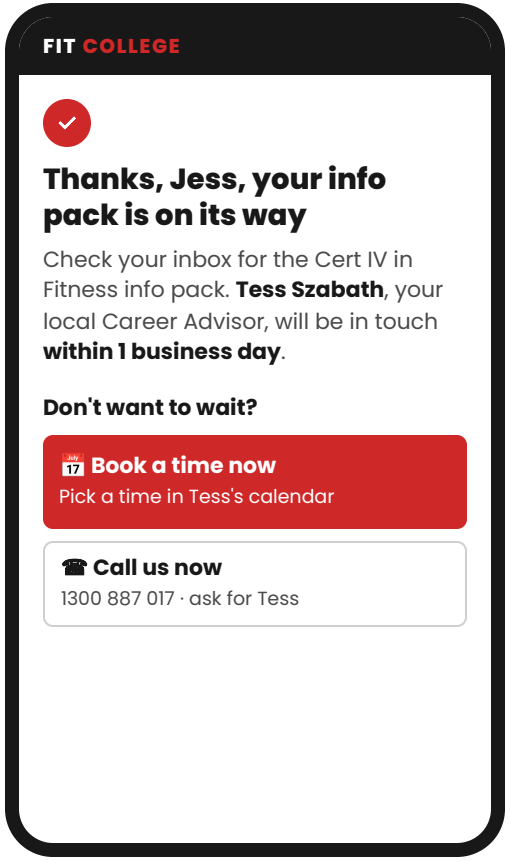

WHAT THE LEAD SEES

Capture → promise → book or call

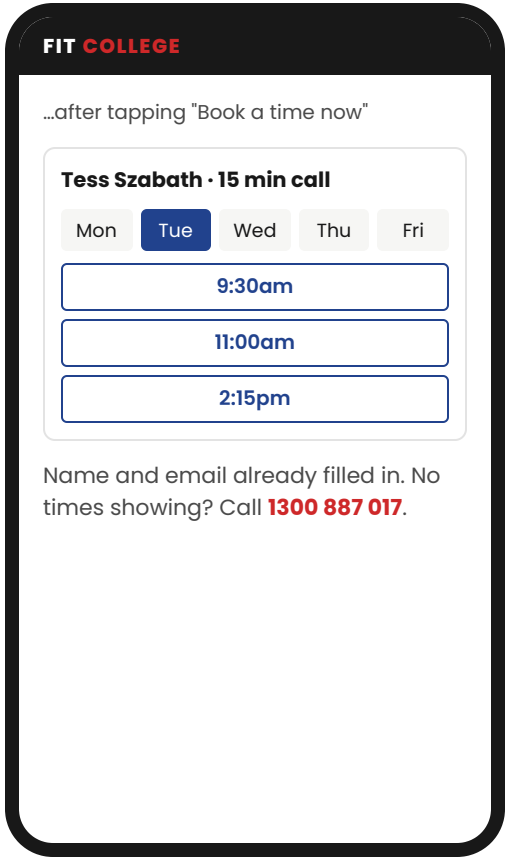

Screen 1 · HubSpot form

Course preselected from the Cert IV page

Screen 2 · Pack + promise + options

Info pack sent, named advisor, clear timeframe

Booking (optional)

Opens Tess's HubSpot calendar in place

THE ROUTING RULES

Checked in this order, first match wins

The website (screen 2) and the HubSpot owner workflow use the same rules.

1	Course is a **non-fitness course** (next slide), from anywhere, including overseas	→ **Shay Best**
2	Where do you live = **Outside Australia** (fitness course)	→ **Overseas owner** confirm **(team for now)**
3	Postcode **is in POSTCODE MASTER**	→ **That postcode's advisor**
4	Postcode **not in the sheet** (e.g. 2055 North Sydney)	→ **Team: "one of our Career Advisors", call option only**

COURSE ROUTING

Fitness by postcode, everything else to Shay

Set in `data/course-routing.csv`. Any course added to the site later and not listed goes to Shay automatically.

By postcode → local advisor

- Not sure yet
- FIT Elite™ Dual-Career PT Program
- Cert III in Fitness
- Cert IV in Fitness
- Diploma of Sport (Coaching) confirm
- Strength & Conditioning confirm
- CEC Short Courses confirm

Shay Best

- Disability Support Skill Set
- Cert IV in Training & Assessment
- TAE Upgrade (TAE40116 → TAE40122)
- First Aid / CPR
- Cert III in Travel
- International Student Pathways
- *Any new course not listed*

WHO COVERS WHAT

Postcode territories

From POSTCODE MASTER vNOV26. Six populated postcodes are missing from the sheet (e.g. 2055 North Sydney): see `data/postcode-sheet-gaps.csv`.

ADVISOR	COVERS	POSTCODES	BOOKING LINK (MEETINGS-AP1.HUBSPOT.COM/…)	STATUS
Ryan Crilly	VIC 445 · SA 343 · WA 269	1,057	ryan-crilly	Ready
Sam Russell	NSW 377 · NT 36	413	sam-russell2	Ready
Tess Szabath	QLD 293	293	tess-szabath	Ready
Dean Eggins	VIC 259	259	dean-eggins	Ready
Thomas Jordan	TAS 115 · QLD 99	214	thomas-jordan2	Ready
Paul Mountain	NSW 141	141	paul-mountain	Ready
Nicky Wood	WA 118	118	nicky-wood	Name check
Matthew Johnson	NSW 90	90	matthew-johnson	Ready
Marcus Krause	QLD 48 · ACT 30 · NSW 1	79	marcus-krause	Ready
Shay Best	Non-fitness courses, nationally	by course	shay-best	Ready

HUBSPOT · FORM BUILD SPEC

One form, every detail on one screen

Name: **Website – Lead capture (advisor routing) 2026**. One form for every enquiry: each submission triggers the info pack and creates the lead.

Visible fields

First name* · Last name* · Email*

Mobile* with **country code dropdown** (AU default)

`course_interest`* dropdown: labels **exactly** as `course-routing.csv`

`where_do_you_live`*: Australia / Outside Australia **new**

→ if Australia: `zip`* (4 characters)

→ if Outside: `country`* (conditional logic)

Consent naming **phone, SMS and email**

Hidden fields

`lead_source_page`: page they came from **new**

`lead_context`: e.g. checker-eligible **new**

`assigned_advisor` · `lead_routing` **new**: set by workflow (and by our code on legacy embeds)

UTMs, gclid, fbclid

Promotion form's hidden fields to copy

Form settings

CAPTCHA (reCAPTCHA): on

After submit: **inline message**, never a redirect (screen 2 replaces it)

Pre-populate known values: **off** for hidden fields

Region `ap1`; tell Kook the editor (new / legacy)

Send Kook the portal ID + form ID

What happens after submit

Workflows

1. **Set contact owner, only if blank.** Branches in rule order; values are paste-ready in `data/hubspot-workflow-lists.txt`. Also sets `assigned_advisor` + `lead_routing`.
   Kook: check HubSpot's limit on "is any of" values (Ryan has 1,057)
2. **SMS speed-to-lead** names the advisor and repeats "within 1 business day". Skip it if they've already booked.
3. **Info pack to everyone**: email the guide for `course_interest` (general guide for "Not sure yet").
4. **Task** for the owner: due in 1 business day, so the promise is kept.

Tracking (GTM dataLayer → GA4)

`lead_submitted` **conversion**

`advisor_book_opened`: tapped "Book a time now"

`advisor_meeting_booked` **conversion**

`advisor_call_clicked` **conversion**

Each carries `assigned_advisor` + `lead_routing`: book vs call vs wait, per advisor

FOR KOOK · ASSETS

Everything needed to build it

All in the repo under `fitcollege-rebuild/`. On any page, the whole flow is one tag: `<div data-lead-flow></div>`

FILE	WHAT IT IS	KOOK ACTION
`js/advisor-router.js`	HubSpot embed (new + legacy editors), course preselect, routing, screen 2, tracking.	Ship sitewide. Set portal + form ID in `FIT_HUBSPOT`. Verify the `[KOOK]` HubSpot calls.
`js/advisor-data.js`	Generated: advisors, postcodes, course routing (16 KB). No staff mobiles.	Ship as-is. Never hand-edit.
`css/site.css` (lead capture blocks)	Form, screen 2 option cards and calendar styles.	Port into the CMS stylesheet.
`contact.html`	Reference placement; `#infopack` and `#book` both land on the one form.	Place one `data-lead-flow` div; keep both anchors.
`data/postcode-master.csv` · `advisors.csv` · `course-routing.csv`	The three source files.	Add HubSpot owner IDs to `advisors.csv`.
`data/hubspot-workflow-lists.txt` · `hubspot-postcode-owner.csv`	Paste-ready owner workflow branches; postcode → advisor table.	Build the owner workflow (slide 9).
`data/postcode-sheet-gaps.csv`	Postcodes missing from / wrong in the sheet.	For the sheet owner, not Kook.
`tools/build_advisor_routing.py`	Regenerates the data; stops on clashes.	Run on every sheet or course change.

EDGE CASES & UPKEEP

No dead ends, no code edits

SITUATION	BEHAVIOUR
Postcode not in sheet	Team promise + call option; `lead_routing` = unmatched for gap reports
Overseas	Country instead of postcode; international phone via country code
Advisor calendar empty (leave, full)	"No times showing? Call 1300 887 017" under the calendar
Came straight to contact page	Course defaults to "Not sure yet"; source page = contact
Returning lead, new postcode	Owner kept (owner-if-blank rule)
Spam bots	HubSpot reCAPTCHA
JavaScript blocked	Phone number shown instead

When territories or courses change

1. Update POSTCODE MASTER and/or `course-routing.csv`.
2. New advisor? Add a row to `advisors.csv`.
3. Run `python3 tools/build_advisor_routing.py "POSTCODE MASTER.xlsx"`. It stops on any clash.
4. Deploy `js/advisor-data.js` and re-paste the changed branch in the HubSpot workflow from `hubspot-workflow-lists.txt`.

ACCEPTANCE

How we'll know it works

CAME FROM / COURSE	AREA	SCREEN 2 NAMES
Cert IV page (preselected)	4558	Tess Szabath
Cert IV page (preselected)	3000	Dean Eggins
Cert III in Fitness	2150	Matthew Johnson
Not sure yet	0800	Sam Russell
Not sure yet	6027	Nicky Wood
TAE page (preselected)	4558	Shay Best
First Aid / CPR	Fiji	Shay Best
Cert III in Fitness	New Zealand	Overseas owner
Cert III in Fitness	2055	"One of our Career Advisors"

Before go-live

- ☐ reCAPTCHA on; a scripted submit is blocked
- ☐ All hidden fields land on the contact (incl. promo-form ones, `lead_source_page`)
- ☐ Screen 2 appears after submit, with the right advisor
- ☐ "Book a time now" opens the right calendar, name + email prefilled
- ☐ Owner set by workflow for a new lead; NOT changed for an existing one
- ☐ SMS < 5 min; owner task due in 1 business day
- ☐ GA4 receives submit / booked / call conversions
- ☐ Stanley sign-off

BEFORE BUILD STARTS

Open items

Copy **Promotion form's hidden fields and settings** into the new form (HubSpot access needed).

Build **The HubSpot form** to slide 8 and the owner workflow to slide 9; send Kook the portal ID, form ID and editor type.

Decide **Who owns overseas fitness leads?** Team until decided.

Confirm Diploma of Sport, S&C and CEC courses route **by postcode**, not to Shay.

Fix Add the **6 populated postcodes** missing from the sheet; check 3 typos.

Supply Round-robin team link · confirm "NICOLA WILLIAMS" = Nicky Wood.

Kook Verify the HubSpot embed/event method names against HubSpot's current docs.
